NPM: 1606954943

Latihan Membuat Service Producer mengembalikan seluruh student

Langkah-langkah yang dilakukan:

- Membuat request Mapping untuk menampilkan seluruh student
- Memanggil method selectAllStudents yang ada di interface StudentService untuk mengembalikan seluruh student

```
@RequestMapping("/student/viewall")
public List<StudentModel> viewall () {
    List<StudentModel> student = studentService.selectAllStudents();
    return student;
}
```

- Memanggil service yang telah dibuat melalui browser dengan mengakses url http://localhost:8080/rest/student/viewall
- Hasilnya adalah sebagai berikut

```
String parse
                                                                                                                                                                                                                                                                                                                                                                                                                                                                   JS eval

                      },
```

Latihan membuat service consumer untuk menampilkan semua student dari StudentServiceRest

Langkah-langkahnya adalah sebagai berikut:

- Melengkapi method selectAllStudents di class studentDAOImpl
- Memanggil service yang menampilakn semua student melalui classs RestTemplate dengan parameter berupa url http://localhost:8080/rest/student/viewall
- Kemudian hasil objek dari RestTemplate diubah menjadi bentuk List

```
@Override
public List<StudentModel> selectAllStudents(){
    StudentModel[] students = restTemplate.getForObject("http://localhost:8080/rest/student/viewall", StudentModel[].class);
    List<StudentModel> list_student = Arrays.asList(students);
    return list_student;
}
```

- · Kemudian dijalankan aplikasi producer dan consumer
- Untuk menguji consumer berhasil mendapatkan data semua student yaitu dengan mengakses url http://localhost:9090/student/viewall
- Maka akan ditampilkan view sebagai berikut All Students

Show 10 v entries

Yang dipelajari dari tutorial 7 ini adalah sebagai berikut:

- Belajar membuat service producer yang menyediakan data berupa object json yang dapat digunakan oleh consumer
- Belajar membuat service consumer yang menampilkan data dengan memanggil web service yang telah disediakan
- Apabila ada perubahan kebutuhan di suatu aplikasi seperti mengubah data source yang awalnya dari database menjadi service producer tidak perlu mengubah file-file yang telah dibuat sebelumnya, tetapi dengan menambahkan file yang dibutuhkan dalam mengimplementasikan pemanggilan web service
- Untuk membuat StudentController mengambil data melalui web service yaitu menggunakan anotasi @Primary
